Profile

A goal-oriented and collaborative professional with years of experience in financial services. Hand on experience with strategic analytics reporting, digital assets analysis, fund management, and alternative assets in investment banking. Holds a graduate-level education focused on management sciences and quantitative methods. Skilled at utilizing analytical tools to better understand data for valuable insights with a focus on Data Analysis, Data Visualization and Strategic Reporting. Ability to adapt quickly, identify inefficiencies and communicate effectively with stakeholders. Passionate about financial instruments, technology and the implication of decentralized ledger technology for decades to come. Seeking a challenging opportunity with a renown and innovative culture where my experience, skills and education can add value to current initiatives and all stakeholders.

SKILLS/CERTIFICATIONS

Machine Learning Models (Regression, Time-series), Statistical Analysis (Exploratory, Predictive, Reporting)
Python (Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn, Streamlit), Data Visualization/BI (Tableau, Power BI) Data Wrangling (MySQL, DBeaver, Alteryx)
Microsoft Office (Word, Excel, PowerPoint, Visio, Project), Coaching and Mentoring – AICPA (06/21)
Blockchain (POW, POS, L1, L2), Defi protocols (Dex, Asset Management, Lend/Borrow, Yield), Tokenized RWA (MMF, FoF, Deposits)

PROJECTS

Institutional Digital Assets Operating Model Library (A set of high-level reference architectures and asset lifecycle designed to demonstrate how regulated financial institutions can integrate digital assets while preserving governance, control & regulatory integrity.)

Stablecoins Analysis (Market analysis of Stablecoins and their functions. The opportunities and risks are discussed. Trend analysis and machine learning modeling are utilized to convey existing relationship between trading volume of Bitcoin and ETH Stablecoins.)

Geography of Cryptocurrency Report (An analysis on received and deposited funds based for specific time period. Fundamental questions are explored to understand existing trends within geographic locations.)

Defi Liquidity Aggregator (A defi liquidity aggregator interactive dashboard. Representation of decentralized application (dapp) as an insightful tool for fundamental understanding of liquidity allocation. Aggregates total value locked, market capitalization, daily volume, and other metrics for tracking Defi activity.)

GFC & Regulatory Compliance Analysis (Analysis on GFC and risk factors associated with banking compliance. Time-series analysis of Suspicious activity fillings is reported via a Tableau.

Capital Markets Analysis (Primary and secondary markets are explored through equity(indices), and bond / Tokenized ETF analysis. Economic factors are reported via a dashboard.)

System Architecture Development (An enterprise system development for data management, service scheduling and daily reporting. An internal Electric Data Interchange was created and tested with reports)

EDUCATION

Master of Science, Management Sciences and Quantitative Methods

January 2021- April 2022

Southern New Hampshire University, Manchester, NH -- NECHE Accredited

NECHE Accredited

Bachelor of Arts, Economics

September 2017- December 2019

Ramapo College of New Jersey, Mahwah, NJ -- AACSB Accredited

EXPERIENCE

Morgan Stanley, New York, NY

March 2023 - Present

Director (AVP), NFR Data Analytics – Visualization & Reporting Solutions (Full-Time)

- Acted as a core contributor to a firm-wide Metrics Enhancement Program, focused on data quality, metric effectiveness, control oversight, and strategic reporting modernization.
- Managed end-to-end design, governance, and delivery of enterprise risk metrics (KRI/KPI) used by Governance Committees, Business Heads, and Board-level stakeholders across global regions.
- Owned authoritative data sources, schemas, and taxonomy alignment, ensuring consistency across enterprise reporting and downstream consumption by risk, audit, and control functions.
- Partnered with regional teams across AMER, EMEA, and APAC to align data sourcing, controls, and reporting standards across multiple business units and operating environments.
- Designed and optimized SQL-based data pipelines to query, transform, validate, and reconcile large-scale datasets, materially reducing manual processing and accelerating reporting timelines.
- Engineered and maintain automation workflows (Python, Alteryx) to support scalable, repeatable metric production and operational resilience.
- Implemented threshold-based escalation frameworks (RAG methodology) to monitor AML, operational risk, and control breaches, including EDD/PEP reviews, control framework issues, and internal audit findings.
- Served as steward of a centralized data aggregation and metrics repository, supporting recurring ad-hoc regulatory, audit, and governance requests.

Manager, Global Financial Crimes (GFC) – Metrics and Reporting Professional (Full-time)

April 2023 - March 2024

BNY Mellon, Woodland Park, NJ

July 2020 - January 2021

Analyst, Fund of Funds Custody (Full-Time)

- Supported daily custodial operations for alternative asset portfolios, ensuring accurate asset servicing, recordkeeping, and reconciliation.
- Utilized operational dashboards and custody management systems to report on fund allocations, holdings, and performance.
- Executed and monitored subscriptions, redemptions, transfers, proxies, and trade instructions, ensuring accuracy and timeliness across settlement workflows.
- Performed daily cash and demand deposit reconciliations, coordinating closely with Treasury and Operations teams.
- Applied AML/KYC **procedures** in fund distribution and client servicing, supporting compliance and audit readiness.
- Authenticated trade instructions and resolved operational inquiries to protect client asset integrity.
- Assisted in adapting operational tooling for custody fee calculation and reporting, improving accuracy and efficiency.

Premium Merchant Funding, New York, NY

October 2018 to September 2019

Funding Specialist (Full-time)

- Supported a funding team responsible for capital allocation to SMEs, coordinating investment workflows and stakeholder communications.
- Analyzed financial statements, credit histories, and contractual documentation to assess risk, compliance, and eligibility.
- Verified business account histories and compliance with financial and operational prerequisites.
- Presented financial products and services to new and existing clients, contributing to increased capital deployment.
- Trained and mentored interns on financial products, operational processes, and compliance expectations.
- Delivered investment and operational recommendations that improved approval quality and client service demand.
